

# Project Prometheus

## Cross-Dimensional Cell Regeneration Study Final Experiment Report

### Mission Information

Mission Code: PRO-2024-001  
Dimension: D-616  
Sample Source: D-199  
Cell Line: Hela-X7  
Energy Source: Black Hole Boundary Radiation  
Report Date: 2025-12-24

### Results Summary

Energy Level 100 TeV: 85.2% inhibition rate (High confidence)  
Energy Level 50 TeV: 62.8% inhibition rate (High confidence)  
Energy Level 25 TeV: 38.5% inhibition rate (Medium confidence)  
Energy Level 10 TeV: 15.3% inhibition rate (Medium confidence)

### Conclusion

The experiment successfully demonstrated the inhibitory effect of spacetime rift energy on cross-dimensional tumor cells. The results show a dose-dependent relationship between energy levels and cell inhibition rates. Further studies with extended observation periods are recommended.
